TÜBİTAK

**Turkish  
Researchers  
Catalogue**

**For EU RTD Programmes**

**TÜBİTAK**  
The Scientific and Technological  
Research Council of Turkey

## Foreword

Knowledge is the most critical asset. This is the basis on which the EU's Lisbon Strategy is structured. The Strategy aims to make EU the most competitive and dynamic knowledge-based economy in the world by 2010. Research and innovation play a key role for the development of technology and know-how. The vision of a well-functioning European Research Area (ERA) and EU's RTD Framework Programmes entails cooperation and coordination within nations as well as among associated countries. The Sixth Framework Programme (FP6), officially launched in 2002, can be considered as the scientific and technological research tool of EU in its attempt to become a world leader.

In harmony with this target, Turkey has set its science and technology strategy, priorities and objectives for the period of 2005-2010 through a participatory and transparent process and relying on Vision 2023 technology foresight study. It seeks to contribute to solving problems, increasing the quality of life, enhancing welfare and boosting competitiveness. The new Strategy defines a Turkish Research Area (TARAL). TARAL aims to synergise research and technological development activities among The Scientific and Technological Research Council of Turkey (TUBITAK), public agencies, non-governmental organisations, private sector companies and universities.

One of the targets under this Strategy is to enhance Turkey's links with ERA. Turkey participates in the FP6 since the beginning of 2003. TUBITAK is the agency responsible for the coordination of national science and technology strategies as well as FP6 activities in Turkey. Participation in FP6 is already contributing to the integration of Turkey with EU in the field of science and technology and creation of economic added value at both the national and European level by means of transnational cooperation. Turkey's

human potential for research in terms of young population and gender balance is another strong asset for ERA.

It is with great pleasure that I am presenting this publication containing valuable information on Turkish researchers who wish to take part in EU RTD Framework Programmes. It aims to introduce Turkish researchers to their European colleagues as potential research partners. As such, I think it contributes significantly to the vision of a Europe as the leading knowledge society in the world.

**Prof. Dr. Nüket Yetiş**  
Acting President of TUBITAK
